**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Although it is towards the end of summer, UV levels will still be high in the prolonged sunny intervals, particularly as you climb further up. Therefore, it is still important to protect exposed areas of skin and stay hydrated.

Forecast for Sunday 29 Aug 2021

Weather: Turning cloudy in the early hours with a few mist a fog patches over the peaks. However, this soon clearing to leave a dry day with lots of sunshine.

Maximum wind: Northeasterly 10-15mph at summits.

Chance of cloud free mountain/hill tops above 800m: 60% during the early hours as low cloud moves in from the north. Improving to 100% from mid-morning as low cloud clears.

Visibility: Very poor in mist and fog, otherwise excellent visibility of distant hills.

Temperature: **Valleys:** Plus 5 Celsius, becoming plus 19 Celsius by the afternoon.
At 800m: Plus 12 Celsius.
Freezing level: Well above tops.

Monday	Another dry day. A bit more cloud developing over the course of the day, but with some decent sunny spells in between. A northeasterly breeze on the hills.
Tuesday	Similar again to recent days with a mixture of sunny spells and scattered cloud. Remaining dry with a northeasterly breeze.
Wednesday	A little mist and fog possible in the valleys at first, but turning into another bright sunny day with light winds.
